## PREFACE

It gives me an immense pleasure to offer the new edition of Desk Book on orthography of Devanagari Script to its learners. The present Desk book is intended to serve as a writing book for learning Devanagari Script. Hindi is a prominent language with its roots in ancient language Sanskrit. One of the tremendous facts about learning Devanagari is that this script is absolutely based on phonetic principles, which means, the words in Hindi are pronounced, just as they are written.

We have tried to keep the script learning in this book with scientific approach and utmost clarity. The method of writing Devanagari has been designed in 13 small units. The individual letters are introduced in nine units with writing exercises. Unit I and II are related with vowel writing. Consonant writing is covered in III to X units. The combination of vowels with their signs (matras) and conjunct letters are unique in Devanagari Script and quite different with other languages. Keeping in view, these topics are dealt in individual sections. The script has been explained with the help of arrows and dots and adequate blank space has been provided against each item for writing practice. Letters are sequenced as they are arranged traditionally. Fifth lesson gives a brief look of symbols e.g. anuswar, anunasik, visarga and hal sign etc.

I hope and have confidence that the present book which is based on the modern teaching and linguistics techniques will cater to a very significant need of learners of Hindi in the country and abroad.

Suggestions and comments for further improvements are welcome.

## INTRODUCTION

Hindi is a modern Indo-European language derived through Sanskrit, Pali, Prakrit and Apbhransa. Hindi is written in Devanagari Script, which has evolved from the ancient Brahmi Script. Devanagari script is a left to right abugida (alpha-syllabary) script and is considered world's most scientific script because it is based and developed on the fundamental principles of phonetics. Devanagari script is one of the most adopted scripts of the world and mainly used to write Sanskrit, Hindi, Marathi, Nepali, Konkani, Dogri with many more other languages. Some salient features of Devanagari can be shown as follows:

- The orthography of Devanagari script is based on pronunciation and because of this; there is no conflict of spellings. There is a separate letter for each syllable, that is called and each letter represents a distinct sound and for this reason one can write what he speaks.
- Devanagari script has a very significant and systemic arrangement of vowels and consonants that is called "Varnmala". The order of vowel and consonants is absolutely based on very precise scientific and phonetic principles of linguistics which consider both the manner and place of articulation of the letters they represent. It may be quite interesting for the researchers and linguists because Devanagari script has been using this order for centuries. This is the testament to the advanced knowledge of the study of phonetics on the soil of saints and sages that is called Bharat.
- The Devanagari script composed 46 basic characters involving 11 vowels (Swar) and 35 (33+2) consonants (Vyanjan). It has a few subsidiary symbols e.g. anuswara, anunasik, hal sign and visarg etc. It is also notable that Devanagari is extraordinarily

capable to transcribe and express different sound variants and is flexible enough to write foreign sounds by attaching marks to the proximate grapheme.

- In Devanagari, the inherent अ (schwa) is implicit in each consonant. The inherent अ is normally muted finally and sometimes medially too, though it exists in writing. Thus, the word राम is pronounced as "ra:m", not "ra:ma". As all the consonants have inherent अ, they are pronounced with the help of vowels, e.g. ग has entity of ga and not of g.
- Each vowel, except अ has special sign, which is called it's "Matra". Thus, the vowels have two distinct forms: the independent form and the dependent form. The independent form is used when the vowel letter comes individually. The dependent form is used when the vowel follows a consonant. Consonants without vowel are written with the help of right slanting stroke, put at the bottom of the consonant. This stroke is called "Hal sign".
- Each consonant in Hindi has full and half forms. While combining with other consonant, they take new form as per their structure. The various conjunct forms of the consonants are categorized on the basis of the mode of change involved.
- In Devanagari, each vowel has 3 scales as per the time Span of its pronunciation e.g. short, long and prolonged. There is only one three scale vowel combination "ओम्", taken from Sanskrit.
- All vowels can be nasalised except ऋ. This nasalisation of vowels is called "Anunasik" in Hindi.
- Hindi is a syllable based language and therefore, unlike English, stress is generally not meaningful in Hindi.
- A special diacritic mark, called "Ardhaswar" is sometimes used with the vowel आ to transcribe the English "o" vowel sound as in "college" (कॉलेज), "doctor" (डॉक्टर) and "football" (फुटबॉल) etc.

- The horizontal headline that runs on letters, called "Shirorekha" is an integral and essential feature of Devanagari orthography and it should be put after finishing the letter.

Second language acquisition is quite complex process which requires extra effort, attention, time and patience. It may be more challenging and difficult for adult learners becoming fluent with a new alphabet or writing system. Keeping in view of all the facts, this book is specially designed for the beginners of any age group, keen in learning Orthography of Devanagari Script.

The mode of writing suggested in the present book is intended particularly for the learners of non-Hindi speaking Indians and foreigners, who are normally used to a script written above the line. For practice in the initial stage, the student has been recommended to draw the headline before writing a letter so that he is able to set his hand to correct and balanced shaping of letters. But soon after as he gains adequate practice in shaping the letters legibly and is able to switch over to fluent writing, he is advised to draw the headline after writing the letters of a word. The characters of the script has been given in their traditional orders, accompanied by Roman characters used to transliterate them and to give an approximate indication of the sound values, which they represent.

## Lesson 3

## Vowel and Vowel Signs

### Unit XI

Devanagari script has unique signs for each vowel except for 'अ'. These signs are called matras.

In this unit, we will learn to form words combining consonants with different vowel signs.

**'अ'**

As we have known earlier in the introduction part, that अ (a) has no vowel sign, and it is inherent in all the consonants.

क् + अ = क

प् + अ = प

Let us see some words:

अब	कर	नमक	अचार
अगर	पल	कमल	अवसर
असर	बस	कलम	अजगर

Now please try to write :

अजर	.....	.....	.....
अमर	.....	.....	.....
असर	.....	.....	.....
अदरक	.....	.....	.....
अरहर	.....	.....	.....

## Vowel sign of 'आ' ( ॠ )

Vowel sign of 'आ' ( ॠ ) is placed after the consonant, e.g.

क् + आ ( ॠ ) = का

च् + आ ( ॠ ) = चा

प् + आ ( ॠ ) = पा

त् + आ ( ॠ ) = ता

Let us practice :

न् + आ =	.....	प् + आ =	.....
ख् + आ =	.....	फ् + आ =	.....
ग् + आ =	.....	त् + आ =	.....
च् + आ =	.....	ज् + आ =	.....

Vowels and vowel signs may come in initial, medial and final stage of a word.

Initial	Medial	Final
आ	काम	रमा
आज	काल	मना
आम	पास	गला
आप	गान	कमा

Now please try to write the following words:

आप	.....	चाचा	.....
आग	.....	काला	.....
लाल	.....	कमला	.....

Observe the following pairs in order to grasp the difference between 'अ' and 'आ'.

मन - मान	गल - गाल
जन - जान	पल - पाल
वर - वार	सर - सार

### Exercise

ऋषि	वृक्ष	अमृत	पितृ

Since ऋ is treated as vowel, it has a vowel sign, which is placed below the consonant, e.g.

## Lesson 4

## Conjunct Letters

### Unit XII

A conjunct is a combination of two or more consonants with no vowel including the inherent 'अ'. Only the final consonant has its inherent vowel 'अ'. In Hindi every consonant has two forms:

1. Full form with inherent 'अ'
2. Half consonant form.

Half forms of consonants are formed in three ways:

- (i) By dropping the final vertical line:

Full form of Consonant	Mode of change	Modified form in words
ख	ख़	मुख्य
ग	ग़	ग्यारह
घ	घ़	विघ्न
च	च़	बच्चा
ज	ज़	राज्य
ण	ण़	पुण्य
त	त़	कुत्ता
थ	थ़	कथ्य
ध	ध़	ध्यान
न	ऩ	अन्य
प	प़	प्यास
ब	ब़	डिब्बा

भ	फ	सभ्य
म	म्	तुम्हारा
य	य्	अय्यर
ल	ल्	हल्दी
श	श्	नाश्ता
ष	ष्	शिष्य
स	स्	खस्ता

(ii) By curtailing a tail.

Consonants which end in round curve, while making a conjunct, the curve is removed :

क	क्	पक्का, क्या
फ	फ्	दफ्तर, मुफ्त

(iii) By placing hal (.) sign at the bottom in consonants having round shape which indicates that inherent 'अ' is dropped, e.g.

ट	ट्	चिट्ठी
द	द्	युद्ध
ठ	ठ्	पाठ्य
ड	ड्	बुड़ड़ा
ढ	ढ्	धनाढ्य
ह	ह्	चिह्न

## Please note

The combination of 'र' with other letters is an exception.

(i) Where 'र' occurs as the first member of a conjunct letter, it is represented by a hook (र) placed over the second letter, e.g.

धर्म - र् + म = म्

सर्दी - र् + दी = दी

(ii) When 'र' occurs as the second member of a conjunct letter, it is represented by a vertical stroke placed towards the lower left of the first letter, e.g.

ग्राम - ग् + र = ग्र

द्रव - द् + र = द्र

(iii) In combination with ट and ड, 'र' is represented by an inverted v (र्) below the consonant

ट्राम - ट् + र = ट्र

ड्राफ्ट - ड् + र = ड्र

Now try to write the conjunct letters

अच्छा	.....	रास्ता	.....
बच्चा	.....	प्याला	.....
ज्वाला	.....	सस्ता	.....

मक्खन	.....	भक्त	.....
हफ्ता	.....	क्लास	.....

गुड्डा	.....	रद्द	.....

Please rewrite the following words twice :

## Unit XIII

**Anuswar (ँ)**

When nasal consonants (ङ, ञ, ण, न, म) are combined with a homogeneous consonant or with य र ल व श ष स ह are represented by a dot (ँ) over the preceding vowel. This sign is called 'Anuswar'. This Anuswar assumes the sound of the nasal of class to which the following consonant belongs. For example:

1. It is pronounced as ङ (velar) while followed by consonants of 'क' varga (क, ख, ग, घ) e.g.

अंक, पंख, गंगा, कंघा

2. It is pronounced as ञ (palatal) while followed by consonants of 'च' varga (च, छ, ज, झ), e.g.

चंचल, पंछी, मंजन, झंझट

3. It is pronounced as 'ण' (retroflex) while followed by consonants of ण varga (ट, ठ, ड, ढ), e.g.

घंटा, कंठ, ठंडा

4. It is pronounced as 'न' (dental) while followed by consonants of त varga (त, थ, द, ध), e.g.

संत, पंथ, गंदा, धंधा

5. It is pronounced as म (bilabial) while followed by consonants of 'प' varga, (प, फ, ब, भ) e.g.

कंप, गुंफन, अंबा, खंभा

6. It is pronounced as per the place of articulation of the particular consonant, such as

य - संयम

र - संरचना

ल - संलग्न

व - संवाद

श - संशय

स - संसद

ह - संहार

7. A nasal consonant combined with another nasal consonant is not represented by Anuswar. It retains its original form, such as -

अन्य	भिन्न
तुम्हारा	अन्न
अम्मा	सन्नाटा
जन्म	सम्मान

## Anunasik (ँ)

Nasalised vowel or nasalization is different from anuswara, as anuswara has consonant value whereas anunasika is a modification of vowel, i.e., the vowel is uttered simultaneously through the nose. Anunasik does not follow a vowel like anuswara but changes the very vowel quality by adding nasal colour to it. It is represented by a sign (ँ) called chandrabindu and it placed above the letter.

The learners are therefore cautioned not to confuse these two linguistic entities. Anunasika has unique entity and this can change the meaning.

सास - साँस	पूछ - पँछ
है - हैं	हंस - हँस
कहा - कहाँ	

## Hal sign (ँ)

When the simple consonant without the inherent 'अ' is specifically to be expressed, a sign of हल 'ँ' (a right slanting stroke) is put below the letter, e.g.

क, ख, ग, च्

## Visarg sign (:)

The sign (:) is called visarg. It has the sound of voiced 'ह'. It occurs almost exclusively in Sanskrit words used in Hindi, e.g.

अतः                      प्रायः                      प्रातः  
पुनः                      सामान्यतः                      फलतः

This sign should not be confused with the colon sign.

## Exercise

1. Please transcribe the following words into Devanagari :

andar	.....

gambhi:r	.....
amba:	.....
pump	.....

2. Write down the words legibly :
